Makerspace safety rules

The Makerspace is on the first floor of Maple Grove Community Library. It is open during normal library hours, except on Thursday evenings, when the Python for Beginners club uses the room.

3D printers

Before you use a 3D printer you must take the free safety course. The course is held every Wednesday at 17:00 and takes one hour. A print job may run for at most 4 hours. Filament costs 5 cents per gram.

Laser cutter

The laser cutter may only be used by adults who have taken the advanced safety course. Never leave the laser cutter alone while it is running. Wear the safety glasses at all times.

Cleaning up

Clean your workspace when you are done. Put tools back on the wall and throw away small scraps in the recycling bin. Report broken tools to the front desk.
